ME

“ *My memories of Rosalie are from the eighties when my son, Damon, and her son, Sebastian, we're in grade school/middle school and good friends. In picking up or dropping off the kids I'd have great conversations with Rosalie. She was, to my mind, the quintessential hippie mom whose care for her family was her top priority. Education, good nutrition and quality life experiences were of great importance to her and things she would strive to bring to her family. It's been years since I've seen Rosalie and I am so sad to hear of her passing. I will always remember her as an authentic person who never compromised her values, one of the many things I always admired in her. My sincere condolences to all of Rosalie's family. May her light continue to shine brightly through each of them.*
